

# MemSR: Training Memory-efficient Lightweight Model for Image Super-Resolution

**Kailu Wu**, Chung-Kuei Lee, and Kaisheng Ma

---

International Conference on Machine Learning (ICML)

Spotlight Presentation

10 July 2022

# Memory Problem

- Typical resolution on smart phone camera: **96MP**

The maximum memory footprint and the average inference time for upscaling  $2 \times$  on LR image of size  $960 \times 540$

# Memory Problem

The maximum memory footprint and the average inference time for upscaling  $2 \times$  on LR image of size  $960 \times 540$

- Typical resolution on smart phone camera: **96MP**
- The **memory limitation** for super-resolution algorithms becomes **non-negligible** on edge devices.

# Solution?

- 
- Plain model?

# Solution?

- 
- Plain model?
  - How to train a strong plain model in super-resolution?

# Solution?

- Plain model?
- How to train a strong plain model in super-resolution?
  - Direct Training 25.30dB
  - Knowledge Distillation 25.67dB (+0.37dB)
  - RepVGG 24.52dB (-0.78dB)
  - RepVGG-bn-free 25.35dB (+0.05dB)

# Solution?

- Plain model?
- How to train a strong plain model in super-resolution?
  - Direct Training 25.30dB
  - Knowledge Distillation 25.67dB (+0.37dB)
  - RepVGG 24.52dB (-0.78dB)
  - RepVGG-bn-free 25.35dB (+0.05dB)
  - Our Initialization + Direct Training 25.97dB (+0.67dB)
  - + Knowledge Distillation 25.99dB (+0.69dB)

# Solution

Transform a trained multi-branch teacher model into an equivalent large-size plain model.

# Solution

Use large-size plain model to compute an initialization of the small-size plain model.

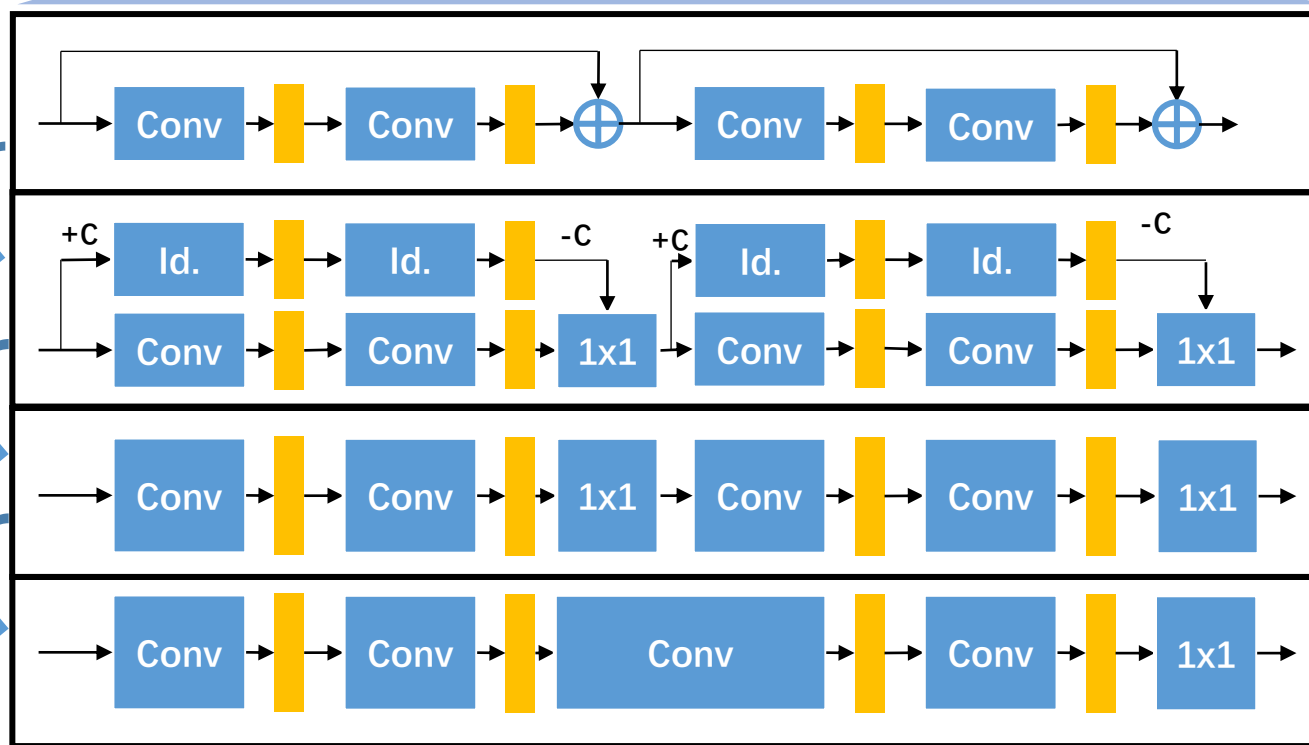

# Stage1

Step1

Step2

Step3

ReLU

Element-wise addition

Conv

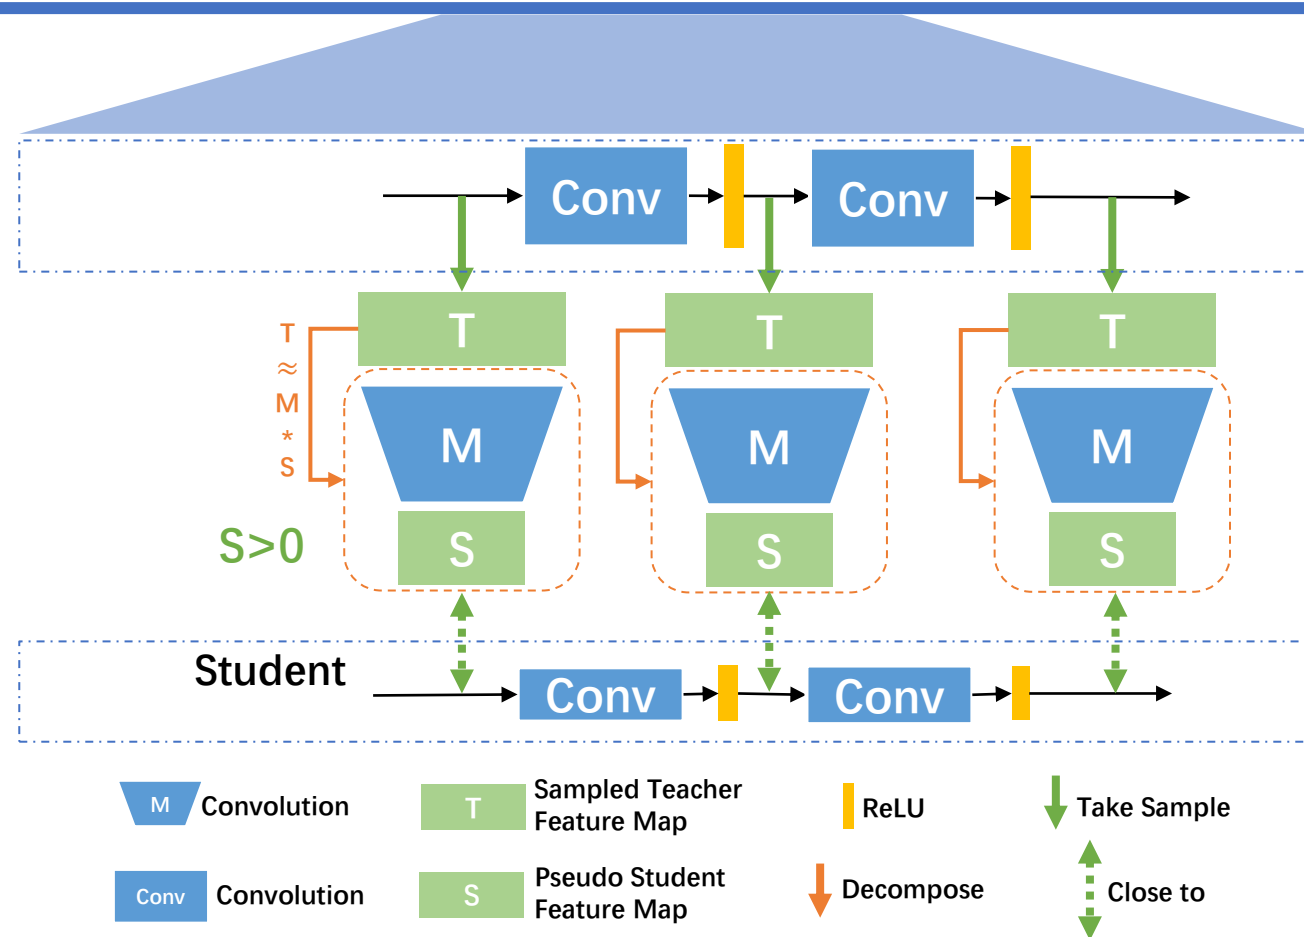

Convolution

Id.

Identity Convolution

Transforms a trained multi-branch teacher model into an equivalent large-size plain model.

# Stage2

Use large-size plain model to compute an initialization of the small-size plain model.

# Results

- Performance on standard benchmarks.

# Results

- Training Curve

converges faster and achieves higher accuracy

- Similarity

knowledge is successfully transferred to the student

**Thank you!**
